SUMMARY

I am a full stack web developer with a background in the automotive/trucking industry, now utilizing my acquired skills in web development by being determined, dependable, adaptable, curious, and creative. Coming from the automotive industry I learned how to use visualization, reverse engineering, and process of elimination to troubleshoot complex problems.

TECHNICAL SKILLS

Languages: HTML-5, CSS3, Bootstrap, Bulma ,JavaScript, JQuery, Node.js

Applications:

PROJECTS

Laughy Tasky | Link to Deployed Project: <https://jpino7.io/TasksForLaughs/>

- Simple Task manager with a reward of a joke or quote after each task is completed and the ability to add up to 10 tasks.
- My main roles in this project were the initial idea and wireframe. I also took on the majority of the javascript for functionality.
- For this project we used HTML-5 and Bulma framework for the front end design. We also used JQuery, JavaScript, moment.js and Greensock.

EXPERIENCE

<https://swif242.github.io/Work-Day-Planner/>

This is my work day planner, it's based on general work day hours that change colors based past, present, future times. Like all my apps I made it mobile responsive to work on phones and tablets.

<https://swif242.github.io/Random-Password-Generator>

This is my Password Generator that takes in inputs from the user for using different character types at for any length you want with a minimum of 8

<https://swif242.github.io/Weather-Dashboard/> This is my Weather Dashboard app that just displays the current days forecast and the next five day for any city. Pretty basic

EDUCATION

Bootcamp Full Stack Certificate: University of Arizona in Tucson, AZ

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS.
